

Nguyen Hoang Giang

Backend Engineer & AI Integration Specialist

📍 Hanoi, Vietnam | ✉️ gianghoang.9955@gmail.com | ☎️ 0819169868 🌐 github.com/GiangHoang9912

Summary

Backend engineer with 5+ years of experience building scalable web services across Node.js, .NET, and Python ecosystems. Proven track record of integrating AI/LLM models (OpenAI, Anthropic) into production systems serving Japanese and Vietnamese markets. Experienced in leading technical teams of 4–15 engineers, designing system architecture, and managing end-to-end project delivery. Seeking a remote backend or full-stack engineering role at a product-focused company.

Skills

Category	Technologies
Backend	Node.js (NestJS, Express, Koa), .NET (C#, ABP Framework), Python (Django, FastAPI), PHP (Laravel)
Frontend	React, Vue.js, React Native
Database	PostgreSQL, MySQL, MongoDB, DocumentDB, Elasticsearch
Cloud & DevOps	AWS (EC2, S3, RDS, Lambda, API Gateway, CloudFront), GCP, Azure, Docker, Kubernetes, CI/CD (GitHub Actions, GitLab CI)
AI / LLM	OpenAI, Anthropic Claude, LangChain, LLama, fine-tuning, RAG
Monitoring	Grafana, Prometheus, ELK Stack, CloudWatch
Payments	Stripe, Alepay
Languages	English (Intermediate — reading & technical communication), Vietnamese (Native)

Experience

Vais — Vietnam AI Solutions (05/2022 - 04/2025)

Senior Backend Engineer → Backend Leader → Technical Leader

Led backend development across multiple AI-driven products for Japanese and Vietnamese clients. Progressed from individual contributor to technical leader managing teams of 4–15 engineers.

Polypi (polypi.ai) — *Team size: 15* AI-powered test generation platform for English exams (IELTS, TOEIC, high school graduation). Integrated multiple AI models (OpenAI, Anthropic) for content generation, speech assessment (Speech Super), and text-to-speech. Architected the

PHP (Laravel) + Vue.js backend serving thousands of practice tests. > **Stack:** Laravel, Vue.js, PostgreSQL, OpenAI, Anthropic, AWS

HLG / Nishibori (Human Log Guard) — *Team size: 4-11* AI dermatology diagnostic system deployed across major cosmetic surgery hospitals in Japan. Built and fine-tuned OpenAI models to detect melasma and freckles from patient images, predict treatment plans, and automate hospital reporting. > **Stack:** NestJS, PostgreSQL, OpenAI (fine-tuned), CloudWatch

Plumber (Unclog.it) — *Team size: 11* On-demand plumber booking platform with Stripe payment integration. Designed the booking flow, real-time technician matching, and payment settlement system. Integrated Google Maps Platform for location-based service area matching. > **Stack:** Node.js, PostgreSQL, Stripe, Google Maps API, CloudWatch

Upshare — *Team size: 7* Cloud-based image management platform for e-commerce (Google Drive equivalent for product images). Built serverless image processing pipeline reducing processing time by 60%. > **Stack:** Node.js, DocumentDB, AWS Lambda

VIONE (memobot.io) — *Team size: 20* Speech-to-text engine for Vietnamese across all three regional dialects. Developed the audio processing API, benchmark comparison framework, and Elasticsearch-powered analytics dashboard. > **Stack:** Koa.js, Elasticsearch, PostgreSQL, Custom AI Models, CloudWatch

Law Search Engine — *Team size: 10* National legal document search engine aggregating all Vietnamese laws. Built distributed web crawlers, Elasticsearch semantic search, and AI-based relevance scoring pipeline over millions of legal documents. > **Stack:** Koa.js, Elasticsearch, PostgreSQL, PhoBERT, CloudWatch

Ehon Book (ehon-inc.jp) — *Team size: 15* Comic book generation platform using Unity 3D for page composition and automated PDF compilation. Integrated Unity rendering engine with Node.js backend for on-demand book production. > **Stack:** Node.js, React, MySQL, Unity, AWS

ESO Systems — *Team size: 10* Enterprise payroll and sales staff management system for a network of English training centers. Designed compensation calculation engine with complex commission rules. > **Stack:** Laravel, Vue.js, PostgreSQL, AWS

NGS Contracting — *Team size: 5* Farm workforce management mobile app tracking daily tasks, foreman assignments, and before/after photo reporting. Led team as Team Leader: created WBS from Figma designs, managed backlog, and handled complex React Native frontend tasks. > **Stack:** Node.js, PostgreSQL, React Native, AWS

Jiffy (jiffy.jp) — *Team size: 9* No-code website builder with drag-and-drop UI, dynamic database creation, and API integration. Generated production-ready React + Node.js code from visual layouts. > **Stack:** Node.js, PostgreSQL, React, AWS

Vietis Corporation (05/2019 - 05/2022)

Intern → Full-stack Engineer

Started as an intern and grew into a full-stack role delivering web applications for Japanese enterprise clients. 3 years of hands-on development across the full stack.

E-commerce Platform — *Team size: 10* Payment processing web app with integrated chat and survey modules for major Japanese gas utility agents. Built end-to-end from database design to deployment. > **Stack:** Node.js, React, MySQL, AWS

Affiliate Marketing Management — *Team size: 10* Campaign management dashboard for a Japanese affiliate marketing company. Migrated legacy PHP system to Django + Vue.js, improving campaign load times by 40%. > **Stack:** Django, Vue.js, MySQL, AWS

Additional Projects: - Inventory management system for mobile phone retail chain (Node.js, React, MySQL) - Network diagram visualization tool using vis.js (Node.js, Vue.js, PostgreSQL) - Face-detection desktop app using C# + EmguCV for ID photo scanning (C#, PostgreSQL)

S-Group (04/2025 - Present)

Backend Engineer

Developing and maintaining backend services for the MM+ Content Management System — a multi-tenant CMS with role-based access control, content versioning, and third-party integrations.

MM+ — *Team size:* 7 Enterprise CMS platform enabling multi-user collaboration, granular RBAC, and API-driven content publishing. Designing RESTful APIs, optimizing PostgreSQL query performance, and managing AWS infrastructure. > **Stack:** .NET (ABP Framework), PostgreSQL, AWS

Side Projects

Anthropilot — VSCode Extension (marketplace) AI coding assistant integrating Anthropic Claude into VSCode. Built custom ChatPDF feature using LangChain for document-aware conversations. > **Stack:** Node.js, Anthropic Claude, OpenAI, LangChain

Auto Crawl & Content Pipeline Automated Amazon product scraper with AI captcha solving (OpenAI), product ranking engine, and Anthropic-powered content generation pipeline auto-publishing to Vocal. > **Stack:** Python, OpenAI, Anthropic

Education

FPT University — B.S. Software Engineering (2017 - 2021) GPA: 3.0 | Capstone: DDGS — Digital Document Generation System using ERNIE + BERT for automated exam creation and plagiarism detection. Served as Project Manager leading a team of 5.
